

UMCG Technology Upgrades

Town Hall Meeting August 7, 2022

TOWN HALL MEETING

Technology Upgrades

Goals

- Improve Worship Experience.
- Improve our technology to create a high-quality livestream of our worship services to better connect to our congregation that can't meet in person and to reach new people.
- Better communication within the building for announcements and wayfinding.
- Ability to show livestream of services (or other media) in different areas in the church building.

TOWN HALL MEETING

A/V Recommendation

- Install new laser projector that can better handle complex lighting conditions, and new projection screen
- Install Remote access cameras to provide high quality recordings/livestreams of services and events in the sanctuary
- Upgrade and improve existing audio technology
- Improve lighting controls in sanctuary

TOWN HALL MEETING

A/V Recommendation

- Upgrade/rebuild A/V Control Booth at rear of sanctuary with appropriate equipment to control Audio, Video and lighting
- Television monitors installed in different areas of the church building to show announcements during the week and switch to showing livestream during worship services or other content we want to share.
- Total Estimated Cost: Approximately \$172,000
